IMAGE DISPLAY PROCESSING METHOD, IMAGE DISPLAY PROCESSING PROGRAM STORAGE MEDIUM, AND IMAGE DISPLAY PROCESSING DEVICE

Abstract:

Abstract of JP2000347645

PROBLEM TO BE SOLVED: To display a menu bar or the like for transmitting a part of visible information such as an image and a character on a lower layer.
SOLUTION: A client computer 2 obtains first visible information and second visible information having a predetermined transmittivity from a predetermined server through a network and displays pixels of the obtained first and second visible information on a first layer and on an upper second layer on a display screen. The pixel of the first visible information and the pixel of the second visible information displayed in a position superimposing the first and second layers each other are synthesized on the basis of a predetermined synthesizing process and are displayed on the display screen so that operation such as clicking on the visible information on the upper second layer can be conducted while viewing the first layer visible information on the lower layer.
